World Milk Day — Bone Health & Joint Care

Monday, 1 June 2026 · Awareness Day + Service Highlight

POST TEXT

🥛 World Milk Day — June 1: Healthy bones for life

Calcium is the foundation of strong bones. Adults need 1,000-1,200 mg daily — about 2 glasses of milk plus curd, cheese, or paneer. Insufficient calcium intake over years leads to osteoporosis, increasing fracture and joint-replacement risk.

At Hope Hospital, Nagpur, our orthopaedics team treats the full spectrum of bone and joint conditions:

- ✓ Total Knee Replacement — Rs. 80,000-1,20,000 (Ayushman Bharat package)
- ✓ Total Hip Replacement — Rs. 90,000-1,40,000 (Ayushman Bharat package)
- ✓ Arthroscopic surgery for sports injuries
- ✓ Spine surgery (microdiscectomy, decompression)
- ✓ Fracture management — 24/7 trauma care

Led by Dr. B.K. Murali (MS Ortho, 19+ years, 5,000+ surgeries). Cashless for eligible Ayushman Bharat cardholders — PMJAY desk verifies on the spot.

📍 Teka Naka, Kamptee Road, Nagpur — 440026

💧 Nagpur summer alert: Kidney stones spike 30% in May-June

The cause is simple: heat + low water intake = concentrated urine + crystallized minerals. Anyone working outdoors, drivers, or those who don't drink enough water are at risk.

Symptoms to act on immediately:

- Sudden severe pain in lower back/side (radiates to groin)
- Blood in urine
- Painful urination
- Fever with pain — go to ER

Modern treatment is fast & free:

- ✓ RIRS laser surgery (no skin cut, same-day discharge)
- ✓ ESWL shock-wave lithotripsy for small stones
- ✓ All covered under Ayushman Bharat for eligible cardholders at Hope Hospital
- ✓ Partnership with NephroPlus dialysis network

Prevention: 3-4 litres water daily, lemon water twice a day, reduce salt.

🌐 Full guide: [hopehospital.com/blog/rirs-surgery-nagpur-kidney-stones-2026](https://www.hopehospital.com/blog/rirs-surgery-nagpur-kidney-stones-2026)

POST TEXT

♥ A heart attack can strike at any time — and the first 60 minutes after symptoms appear are the "Golden Hour." Acting fast saves heart muscle.

Heart attack warning signs (call for help immediately):

- Chest pain or pressure (may spread to arm, jaw, back)
- Sudden shortness of breath
- Cold sweat with nausea
- Unusual fatigue (especially in women)
- Dizziness or lightheadedness

If you suspect: CALL 0712-2980073 IMMEDIATELY. Time = heart muscle saved.

At Hope Hospital's Zion Cardiac Centre:

- ✓ 24/7 cath lab for emergency angioplasty
- ✓ Coronary angiography & angioplasty (Rs. 60K-1L Ayushman package)
- ✓ CABG bypass surgery
- ✓ Pacemaker implantation
- ✓ Cardiac ICU

Free under Ayushman Bharat for eligible cardholders.

 World Environment Day — June 5

Air pollution is one of the top global health risks. Long-term exposure raises the risk of:

- Lung cancer (especially with tobacco use)
- COPD (Chronic Obstructive Pulmonary Disease)
- Asthma flare-ups
- Heart disease

Protect yourself in Nagpur:

- ✓ Avoid outdoor exercise during high-pollution evenings
- ✓ Use N95 masks in heavy traffic / construction zones
- ✓ Indoor air purifiers if you have respiratory issues
- ✓ Plant indoor air-purifying plants (snake plant, peace lily)
- ✓ Annual lung-health check if you smoke or have prolonged exposure

Warning signs to see a doctor:

-  Persistent cough >3 weeks
-  Shortness of breath getting worse
-  Blood in sputum
-  Voice change / hoarseness

Lung cancer treatment — surgery + chemotherapy — is covered under Ayushman Bharat (PMJAY) for eligible cardholders at Hope Hospital, Nagpur.

 NABH = National Accreditation Board for Hospitals

It is India's highest hospital-quality certification — and Hope Hospital has been NABH-accredited since 2012, making us Central India's first NABH-accredited super-specialty hospital.

What NABH means for you as a patient:

- ✓ Standardized clinical protocols (every procedure follows national best practices)
- ✓ Patient safety audits at every level
- ✓ Trained, credentialed medical staff
- ✓ Infection control standards
- ✓ Continuous quality improvement reviews
- ✓ Patient rights and grievance redressal

Hope Hospital at a glance:

-  200+ beds, 30 ICU beds, 3 modular OTs
-  9 specialty departments
-  24/7 emergency
-  NABH since 2012 · Hospital since 2004

When choosing a hospital for serious procedures, NABH accreditation should be your first checkbox.

 World Food Safety Day — June 7

Summer + monsoon transition = peak food-poisoning season in India. Contaminated water, street food, undercooked meat, and dairy left out are top culprits.

5 simple food safety rules for monsoon:

1. Drink only filtered or boiled water — even ice cubes
2. Avoid pre-cut fruits from street vendors
3. Eat hot, freshly-cooked food (avoid cold buffets)
4. Wash hands before eating
5. Refrigerate leftovers within 2 hours

When to see a gastroenterologist:

- Diarrhea lasting >2 days
- Blood in stool
- Persistent vomiting (can't keep water down)
- High fever
- Severe abdominal pain
- Dehydration signs (dry mouth, dizziness, reduced urine)

Hope Hospital's gastroenterology team treats:

- ✓ Acute gastroenteritis / food poisoning
- ✓ Endoscopy & colonoscopy
- ✓ Gallbladder stones (laparoscopic surgery — Ayushman covered)
- ✓ Liver disease
- ✓ Chronic acidity & reflux

Led by Dr. Nikhil Khobragade (Gastroenterologist).
